WHEN ALL
YOU WANT
IS A QUIET PLACE TO WORK

ABOUT US

We like peace and quiet at work. That's why we started SilentLab: to make silence and deliver it wherever it is scarce. Our unique acoustic concept will soundproof anything in your interior and bring peace and privacy to even the noisiest of spaces.

Open plan offices are more popular than ever, but more human interaction means more noise. In order to create soundproofed spaces where employees can concentrate on their work better, we have acoustic experts on our team and manufacture all products ourselves. In our production halls in the Czech Republic, we create unique soundproof mobile pods, acoustic wall and ceiling panels, dividers and acoustic seating and poufs.

We design comprehensive acoustics for your space according to your specifications. To ensure that everything works perfectly, we are also happy to prepare fully customized solutions. Since we love design as much as we love quiet, we pay as much attention to how they look as to how well they work.

VALUES

SUCCESS

We will not settle for compromise. Whatever we do, we always aim to exceed our customers' expectations and deliver the highest quality products and services.

COURAGE

We're not afraid to venture into the unknown. We see atypical and complex projects as challenges we are happy to meet.

TEAM ENERGY

We have fun together and it shows in our work, but we also know how to pull together when the going gets tough. We never give up.

QUALITY

We provide premium products and services, so we stand behind their 100% quality. Every implementation at the customer's site is unique to us and represents an opportunity to improve and gain new experience.

SUSTAINABILITY

We are serious about a sustainable future for our company, our community and our planet. We cherish the environment and do our best to treat it with respect.

CONCEPT

Our iconic MICROOFFICE® and SPARK ranges create an oasis of silence right in the midst of office hustle and bustle. Only a door click separates you from uninterrupted work. Whether you need to handle a business call, focus on tasks, or simply enjoy some privacy, our soundproof pods provide absolute isolation while keeping you emotionally and visually connected to everything around you.

Design approach is one of duality, an act of balance between fundamental principles – body and space, transparent and unobtrusive, unyielding yet soft, intimate yet open.

The interior space is surrounded on all sides by a solid shell. The resulting object is opaque from one point of view, a tangible barrier dividing two worlds. From another perspective, it is nearly invisible as it merges with its surroundings. The UNIQ, QUADRIO III a IV glass ceiling adds the bonus of natural daylight inside the meeting room. In addition, pro-cognitive lighting can be installed to make you feel like you are working in the open air.

The innovative new SPARK range brings peace and quiet to the demanding conditions of manufacturing and logistics halls, medical facilities and noisy offices. It differs from the upholstered MICROOFFICE® range by its highly resistant powder-coated steel shell.

Execution and choice of materials are a priority for us. Flawless workmanship, sophisticated details and the perfection of all elements underline the simplicity and strength of the whole concept.

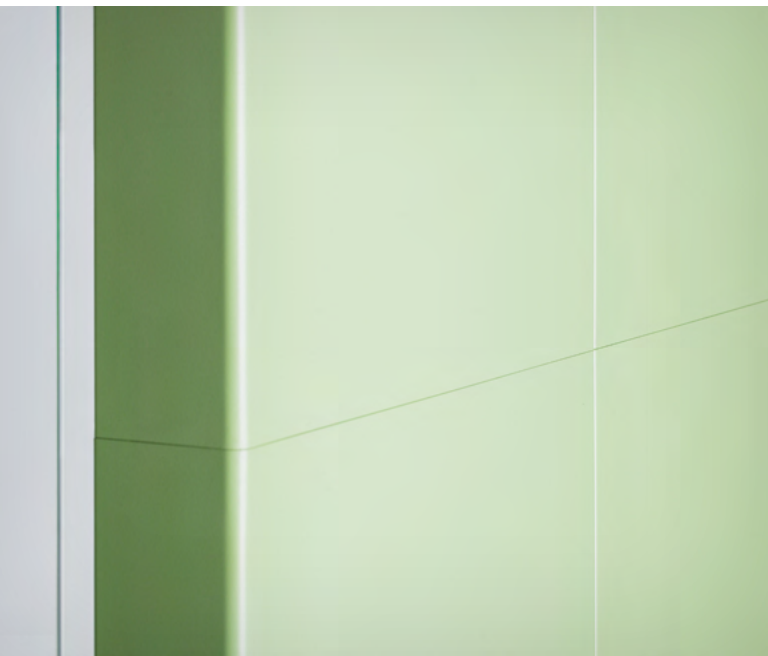

ACOUSTICS

Our products are our answer to noise in modern open space offices. Perfectly functional interior and exterior acoustics not only ensure you a quiet place to work, but also promote concentration and let you hear yourself think. High-quality materials, a quiet ventilation system, and precision soundproof doors ensure exceptional sound isolation, both internally and externally, in our acoustic pods.

We have concentrated on working with the ideal reverberation time and the natural sound of the spoken word, which you will appreciate especially during telephone or conference calls. Optimal placement of sound absorption materials keeps the acoustic environment quiet and pleasant.

DESIGN

We have combined a modern acoustic concept with a minimalist and functional design. The horizontal segmentation of the upholstered surfaces breaks up the dimensions and adds to the elegance of the unit as a whole. Rounded edges in the acoustic room emphasize harmony, relaxation and comfort. The entire complex is organized to follow the ideal ergonomics and the correct height distribution of the interior for maximum comfort.

TECHNOLOGY

Maximum comfort is needed for efficient work. An innovative ventilation system, gives you a constant supply of fresh air so you can use your workspace for hours without interruption.

Besides the ventilation system and LED lighting, an absolute standard also includes an electrical socket, motion sensor, and control panel for ventilation and lighting.

The optional lighting in the form of pro-cognitive light also contributes to improved cognitive performance at work, subjective satisfaction and overall comfort. It not only contributes to higher energy but also improves health, mood and regeneration.

MATERIAL

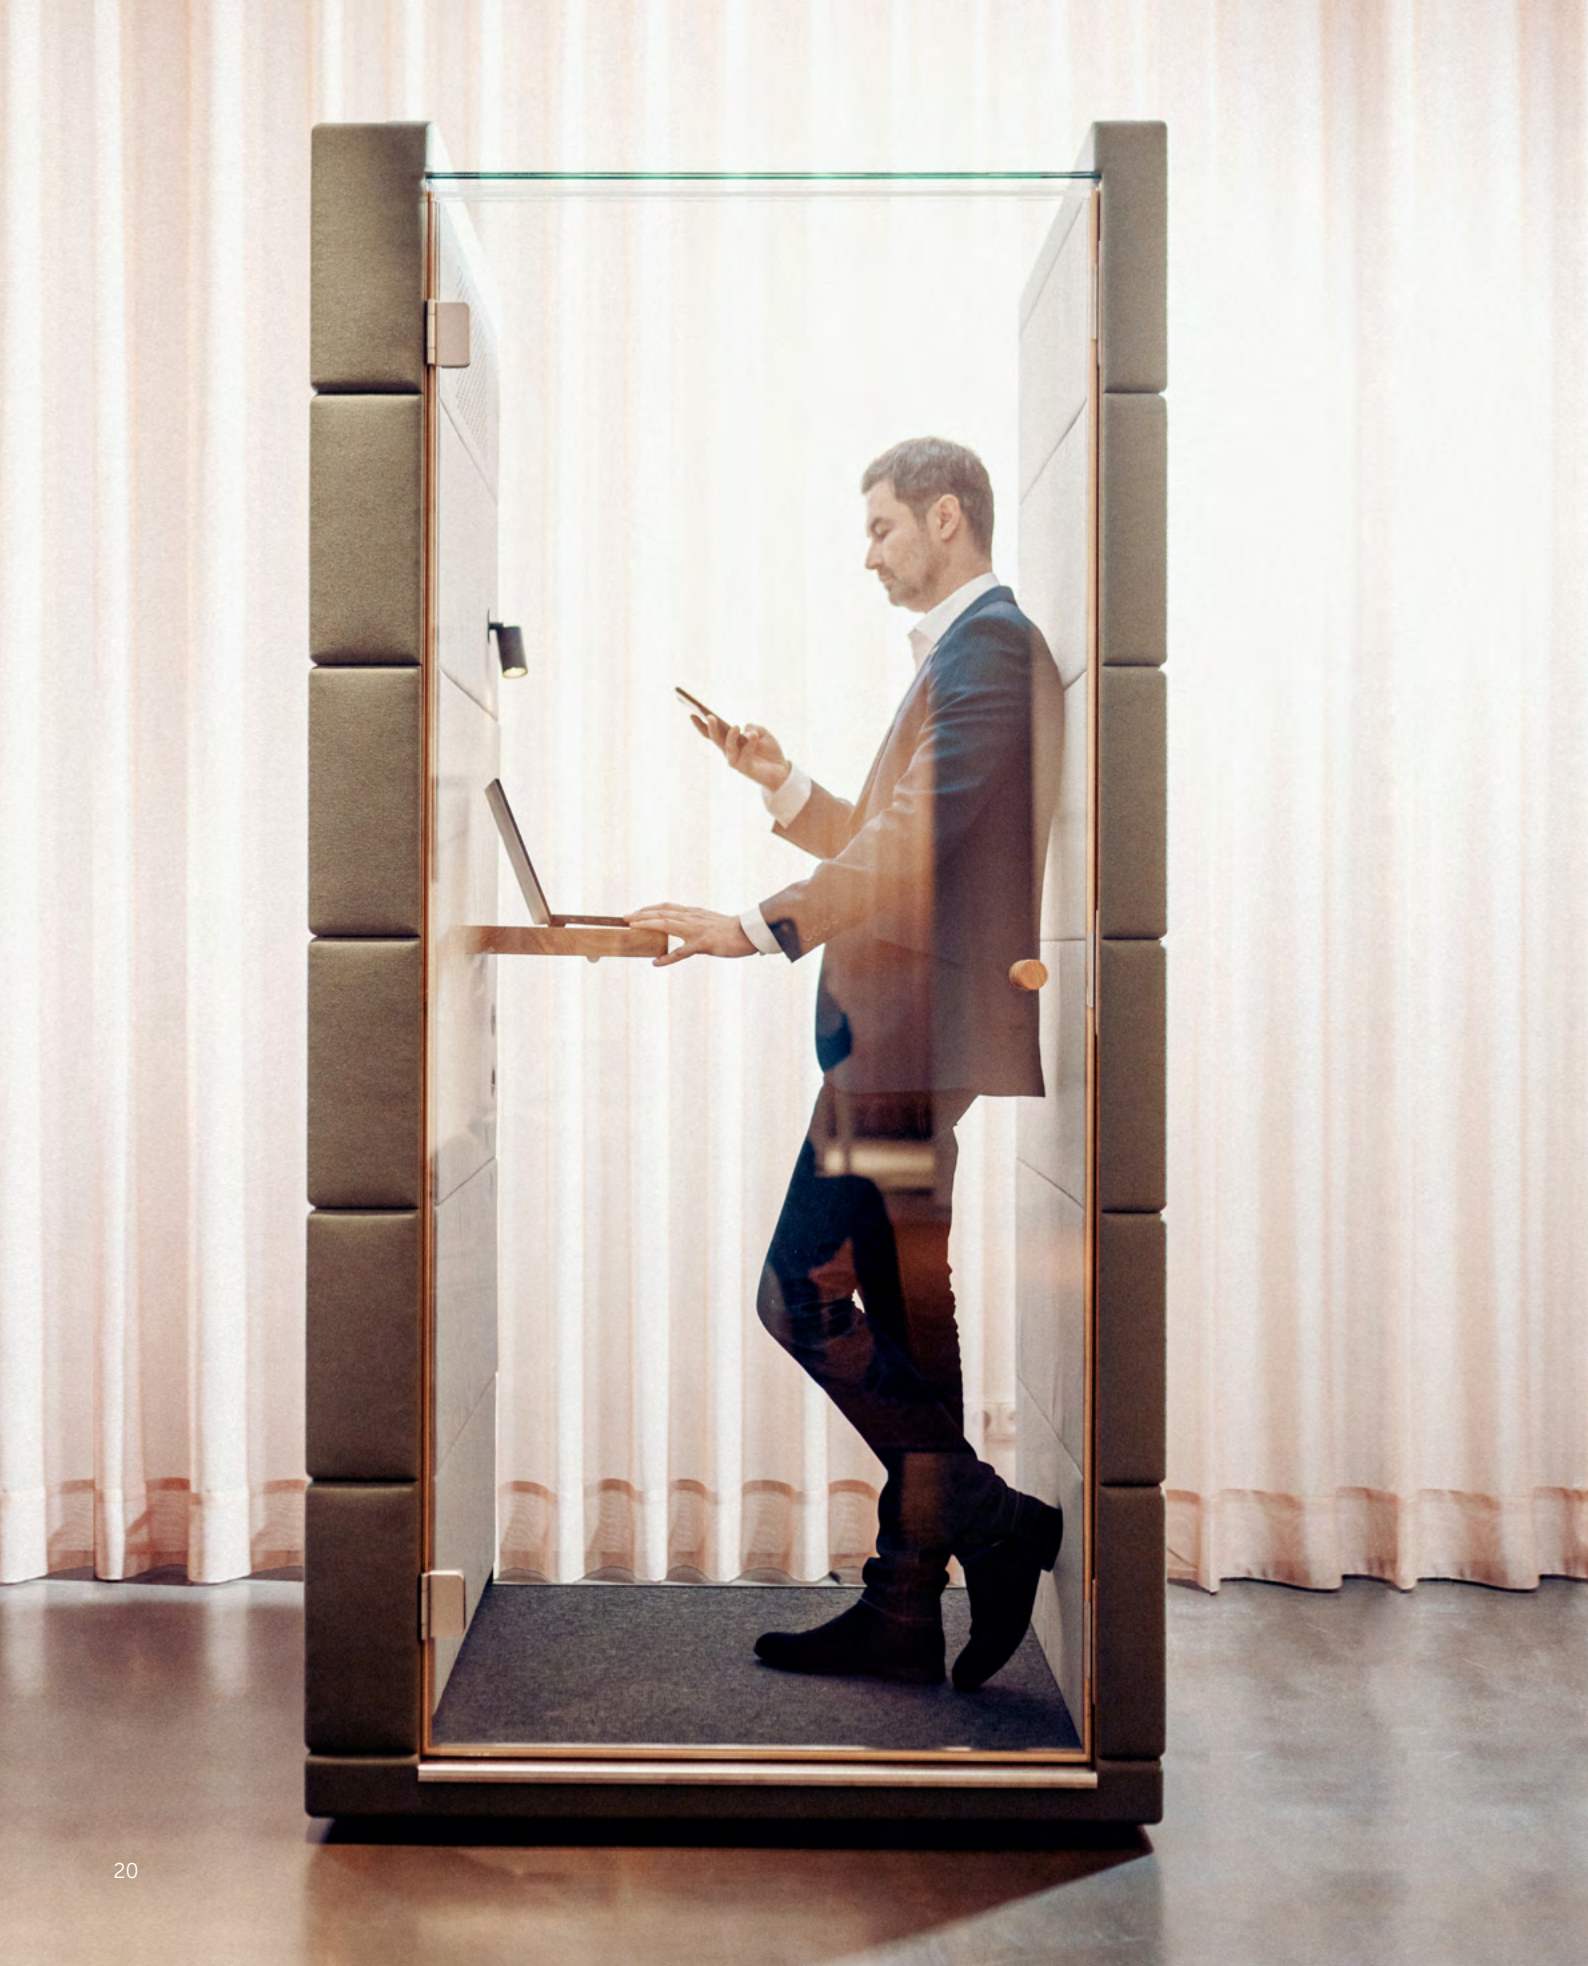

Behind the perfect acoustics is a careful selection of quality materials. Soundproofing is expertly attained through the integration of acoustic infills and specialized soundproof glass. The solid construction is upholstered with fabrics that are pleasant to the touch and available in the color and texture you choose from our swatches.

The sophisticated design is complemented by the unobtrusive metal elements making up the individual construction details and the perfect connection of the glass walls. The warm allure of oak wood infuses vitality into the interior, elevating its aesthetic appeal.

MICROOFFICE

ICONIC
DESIGN
AND BLESSED SILENCE

UNIQ

reddot design award
winner 2019

MICROOFFICE

UNIQ

Sometimes you need some quiet time to focus, but you also want to stay in touch with what's going on in the office. UNIQ respects both requirements. The glass roof and two glass walls let in plenty of natural light, while the noise-resistant glass and acoustic upholstery ensure perfect soundproofing.

OASIS OF PEACE FOR INDIVIDUALS

PRIME

MICROOFFICE

PRIME

The ideal space for concentrating on work in a noisy office. PRIME not only provides sufficient privacy and quiet, but also serves as an acoustic element for the surrounding space. Thanks to the wall upholstery made of high-quality acoustic materials, it absorbs ambient sounds and dampens noise in the office.

FOCUS ROOM WITH VARIABLE SPACE

CUBIQ

reddot design award
winner 2019

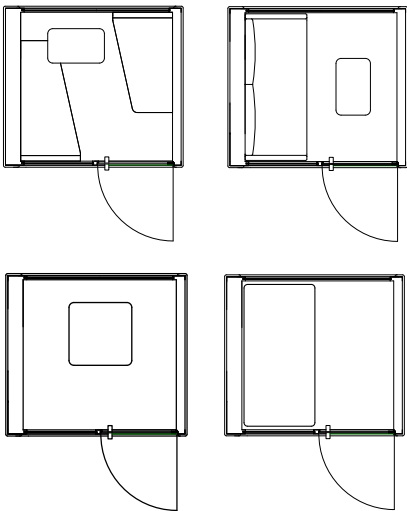

MICROOFFICE

CUBIQ

Do you need to concentrate? Looking for a place where you can think or have a conversation without distractions? CUBIQ variable focus room can accommodate two to four people. It is large enough that you can separate your workspace and replace one workstation with a perfect oasis of silence. With up to four different layout options, it can accommodate, for example, bar seating, comfortable chairs or video conferencing equipment.

CLARITY SYSTEM

We want to make your time in the booth as comfortable as possible. That's why we offer the Clarity System technology, based on an air treatment system, ionization, which together with the high air flow through our powerful fans ensures freshness, ionization and disinfection of the air inside our quiet zones without the use of chemicals.

TECHNICAL DETAILS

location	inside the ventilation bowels MICROOFFICE®
ozone concentration inside MICROOFFICE®	< 0,01ppm*
ion production	10 000–200 000 positive and negative Ions per cm ²
certification	RoHS, EMC, CE and UL

* The international standard for ozone concentration is defined by a maximum value of 0,05ppm.

IONIZER FUNCTION

- effectively neutralizes a wide range of hazardous microorganisms including COVID and SARS
- neutralizes odors
- reduces the risk of allergic reactions in allergy sufferers
- discharges static electricity and prevents electrostatic build-up
- does not use chemical air treatment
- effectively disinfects rooms

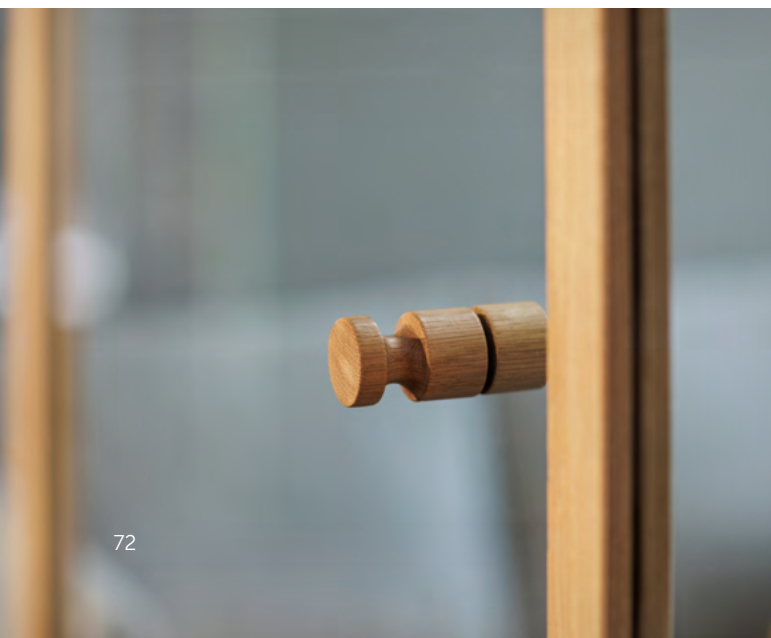

Clarity System is fully integrated into the ventilation system.

DESIGNERS

JAN KALIVODA & VOJTĚCH KAAS **PROGRES ARCHITEKTI**

We are an architecture studio. We've been working with space, mass, light, materials and feelings in projects large and small since 2006. We believe that respecting the unique conditions for each project makes architecture. Strong, functional, balanced.

We take pride in a job well done. Our projects place a high emphasis on the quality of the indoor space. Ergonomics, lighting, and especially acoustics are key topics for us, and our designs for the MICROOFFICE® and SPARK product ranges reflect as much.

We greatly value our partnership with SilentLab, as they are one of the few not afraid to seek out new paths and push the boundaries of what is technically possible. The result is exceptional products with international recognition.

FRESH COLORS
AND GREAT
ACOUSTICS

STILL

WALL PANELS

STILL

Acoustic wall panels not only improve the overall acoustics in a room, but also serve as a design element. You just need to choose the right shape and a suitable color variant. The advantage of STILL wall panels is that they are designed to absorb the frequencies created by the human voice, reducing background noise while brightening up your office walls.

DESKTOP DIVIDERS

MYSPACE

The best way to separate individual workstations in an open space is to use a desktop acoustic divider. MYSPACE desktop dividers are made of top-quality acoustic foam specially developed for noise absorption. The divider's surface made of a solid, high-quality fabric also serves as a private notice board.

DETAILS

FREESTANDING DIVIDERS

SHADE TIMBER

Set up SHADE TIMBER dividers in the office to instantly create an acoustic barrier that absorbs unwanted sounds. This allows you to silence, for example, the conversation of colleagues over a cup of coffee or the noise of the printer. The dividers are very easily portable and you can position them to suit your needs and your office layout.

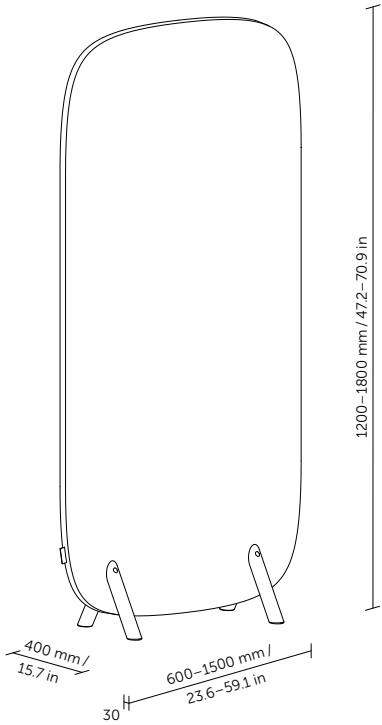

Technical sheet

TECHNICAL DETAILS

basic dimensions	standard height 1200, 1500 and 1800 mm / 47.2, 59.1 and 70.9 in standard width up to 1500 mm / 59.1 in custom sizes available upon request
material	support plate covered on both sides with sound-absorbing material
finish	decorative fabric (refer to swatches)
feet	solid oak wood

SHADE HEAVY

ACOUSTIC
SPACE
DISTRIBUTION

FREESTANDING DIVIDERS

SHADE HEAVY

Can greater thickness be an advantage? In the case of the SHADE HEAVY divider, yes. The divider is thicker than standard types, making it easier to absorb unwanted sounds. Simply arrange the dividers around the office and the desired peace and quiet will prevail.

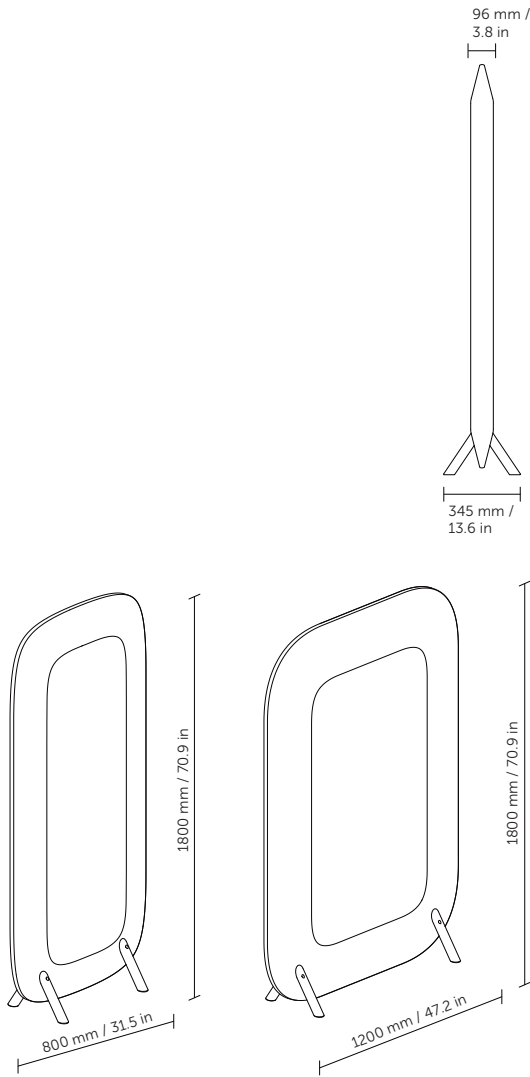

Technical sheet

TECHNICAL DETAILS

basic dimensions (w x h)	800 x 1800 mm / 31.5 x 70.9 in 1200 x 1800 mm / 47.2 x 70.9 in
material	support plate covered on both sides with special sound-absorbing material
finish	decorative fabric (refer to swatches)
feet	solid oak wood
acoustic properties	$\alpha_w^* = 1,00$ – class A – very high absorptive (weighted coefficient of sound absorption)

* measured in compliance with ISO 354, evaluated in conformity with ISO 11654

SHADE MARK

MARKER BOARD

SHADE MARK

The SHADE MARK serves two useful functions in the workplace. Like our other dividers, it absorbs noise and minimizes the inconvenience of an open space office. This version, however, also has a glass writing surface on one side, doubling as a white-board for notes, presentations, brainstorming sessions and other team meetings.

MATERIAL LINES

MATERIAL LINES

Have you chosen the best acoustic solution for your office? Now you can choose from a range of colors in one of our three material lines.

SOFT

The basic SOFT series is the most affordable version of our products. It combines functionality and simplicity of materials, BOMBAY fabrics look professional and warm at the same time. They are also water-repellent and stain-resistant.

AMBIENT

The AMBIENT mid range presents two attractive options. ASPECT textiles with a soft, touchable pattern that is made of Trevira CS flame retardant fiber. The second option is WOOLLAND, a durable fabric made of natural wool fibers treated to be flame retardant and water repellent.

PULSE

The top of the range PULSE puts the emphasis on superior texture and an excellent tactile experience thanks to its natural materials.
